

# Cordless STAR Smart Door Lock

Smart Door Lock with Dual Cameras, 3D Face Recognition, Palm Vein Access, Tuya App and Indoor Display

## Important Note

No official manufacturer PDF datasheet was found during online checking. This datasheet is a Connect Gates prepared product sheet based on available Cordless/authorized reseller product information. Unpublished values such as battery capacity, exact dimensions, memory capacity and IP rating should be confirmed before final quotation.

## Overview

Cordless STAR Smart Door Lock is a premium smart access solution designed for modern homes, apartments, villas and office entrances. It combines smart locking, biometric authentication, indoor display, dual-camera monitoring and remote communication to provide a complete door security experience.

## Key Features

- Dual cameras with external visitor monitoring and internal viewing support.
- 3D Face Recognition for fast hands-free access.
- Palm Vein Recognition for advanced biometric security.
- Fingerprint unlocking for daily user access.
- PIN / Password access for flexible entry management.
- Magnetic card access for users and family members.
- Mechanical key for emergency manual unlocking.
- Tuya Smart App support for smart control and remote operation.
- Wi-Fi connectivity for app-based features and visitor communication.
- Indoor display screen for video viewing and alerts.
- 2-way video/audio call to see, hear and speak with visitors.
- CNC precision metal body for premium appearance and durable construction.
- Suitable for wooden, armored and reinforced doors depending on installation conditions.

## Technical Specifications

Item	Specification
Brand	Cordless
Model Name	STAR Smart Door Lock
Product Type	Smart Door Lock / Smart Access Lock
Access Methods	3D Face Recognition / Palm Vein / Fingerprint / PIN / Magnetic Card / Mechanical Key / Tuya Smart App
Camera System	Internal + External Camera
Display	Indoor display screen for video and alerts
Communication	2-way video and audio call
Connectivity	Wi-Fi

Item	Specification
Mobile Application	Tuya Smart / Smart Life ecosystem support
Body Material	Premium metal body
Manufacturing / Finish	CNC precision carving / CNC precision build
Compatible Door Types	Wooden doors / armored doors / reinforced doors
Recommended Use	Homes / apartments / villas / offices / premium entrances
Available Colors	Black / Brown, subject to supplier availability
Battery Capacity	Not published - confirm before quotation
Dimensions	Not published - confirm before quotation
Door Thickness Range	Not published - confirm before quotation
IP Rating	Not published - confirm before quotation
User / Card / Fingerprint Capacity	Not published - confirm before quotation

## Applications

- Main entrance doors for residential apartments and villas.
- Premium office entrance doors.
- Doors requiring biometric access and visitor video communication.
- Smart home projects using Tuya / Smart Life ecosystem.
- Wooden, armored or reinforced doors where installation conditions are suitable.

## Connect Gates Recommendation

Recommended for customers who need a high-end smart door lock with advanced biometric access, visitor monitoring, indoor display and remote control. Before final supply, Connect Gates recommends confirming door thickness, handle direction, door material, lock body compatibility, available color and battery specifications.
